

When good safety programs go bad!

ASH

2008 ORMCA Safety & Health Workshop
Thursday, March 6, 2008 - Columbus, OH - 9 a.m. - 3 p.m.
2600 Corporate Exchange Dr., 1st Floor. Conference Room, Columbus 43231

How effective is your current safety program? Is it enforced and followed by your employees daily, monthly, yearly? Do your employees even know there is a safety program in place? **When safety regulations are not properly enforced and followed, or become too lax, the result can lead to costly OSHA fines, serious injuries or even death of your most valuable asset . . . your employees.**

Currently, fall protection has come under scrutiny within the concrete industry. There have been several documented cases that have resulted in serious implications. Join us on Wednesday, March 6th at the 2008 **ORMCA Safety & Health Workshop** to learn what to do when good safety programs go bad. Learn how to improve on your current safety program, how to cut costs and how to protect against an OSHA inspection.

The workshop will be hosted by the Ohio Ready Mixed Concrete Association (ORMCA) at their offices located at 2600 Corporate Exchange Dr., 1st Floor Conference Room, Columbus, OH 43231, from 9:00 a.m. - 3:00 p.m. Gary Hanson, President of American Safety & Health Management Consultants, Inc., (ASH) will conduct the workshop which will cover topics for improving your profits through an effective safety program, management and employee responsibilities and OSHA updates for 2008 including the 25 most often cited OSHA standards for the ready mix industry and more!

The cost to attend the workshop is \$85 and includes continental breakfast, breaks, lunch and all workshop materials. **This is one workshop that you can't afford to miss, your employees life may count on it.**
