

NORTHWEST OHIO CONCRETE

CONCRETE OPTIONS

Make plans to attend, "Concrete Options," presented by NW Ohio Concrete on Thursday, November 15th at the Holiday Inn French Quarter in Perrysburg, OH from 8:30 A.M. – 3:45 P.M.

This seminar is intended for engineers, designers and those in the industry interested in an in-depth look at specifying and designing concrete, how to understand a petrography report, how to analyze concrete defects and realize the fix. Very excited Mr. Jeremy Gregory, MIT Sustainability Hub Executive Director will make two presentations on managing your pavement assets as well as all design criteria to consider.

Ohio Concrete will provide an update on the latest specifications and the impact they will have on state related construction in regards to Ohio Department of Transportation (ODOT).

A valuable opportunity will be presented in regards to decorative concrete applications for both pavements and vertical projects. An excellent speaker from Euclid Chemicals will make this presentation and talk about the many opportunities, your mind is really the limit.

Finally, we have a very interesting and unique presentation featuring the design and development of the Veterans Memorial in Columbus Ohio and the part concrete played.

The seminar will also highlight case studies presented by engineers and owners who utilized concrete for local projects including:

- Norwalk Drag Strip
- ODOT District One I75 / SR15 Interchange
- Defiance School w/ Parking Lot
- East Broadway / Edwin Drive, City of Toledo
