March 14, 2019

The Honorable Larry Obhof
Ohio Senate
Statehouse, Rm. 201
Columbus, OH 43215

Dear Senator Obhof:

Ohio’s roads, highways and bridges are critical factors to the safety of our citizens and to our state’s economic prosperity. For years, Ohio has relied on short-term fixes for funding our roads to put off difficult decisions that we face today. Our ability to maintain a safe, efficient and economically competitive transportation infrastructure is in jeopardy.

We appreciate the House of Representatives’ commitment to new funding for our roads and bridges, however House Bill 62, as passed by the House, falls significantly short. Rather than solve our funding shortfall, it simply creates a smaller shortfall.

We also appreciate that the House recognizes that counties, townships, cities and villages have gone underfunded for years, and has taken steps to increase local funding. Local governments, however, also rely on state investment in many local projects. At the levels proposed by the House, these local projects simply can’t happen.

Ohio has the nation’s fourth largest interstate highway system and the second largest inventory of bridges. We rank third in freight volume, with $1.1 trillion in goods shipped to and from sites in Ohio, mostly by truck. We’re sixth in total vehicle miles traveled, with 118.6 billion miles annually. And nearly 2.4 million full-time jobs in Ohio in key industries like tourism, retail sales, agriculture, and manufacturing are dependent on the state’s transportation infrastructure network.

The House-passed version of the transportation budget fails to cover even basic maintenance needs. There will be no revenue for improvements, large or small. In fact, the Transportation Review Advisory Council — the body that assists ODOT with major project selection and prioritization — has canceled its 2019 meeting due to lack of major new funding. This means that critical and long-scheduled major projects will not happen, and those that are scheduled in phases will remain only partially complete.

Governor DeWine’s proposal to increase the state motor fuel tax by 18 cents per gallon and index it to inflation will keep Ohio’s motor fuel tax in line with surrounding states while allowing for adequate roadway maintenance and improvement program for years to come. And we remind you that Ohio’s motor fuel tax has the added fairness of being a true “user fee.” Only those who purchase fuel pay the fee, and the Ohio Constitution mandates that motor fuel proceeds can only be used for state and local roadways.
We appreciate that the General Assembly does not take raising taxes lightly. But an inadequate increase will only compound an already difficult decision — taxpayers will pay for a tax that doesn’t provide results, and lawmakers will be forced to revisit the issue all too soon.

Ohio needs bold leadership on this issue. Without adequate funding, our transportation system will continue to fall into disrepair, becoming more dangerous and increasingly expensive to repair and maintain. In the economic interests of all Ohioans and for the safety of our motorists, we strongly encourage the Ohio Senate to provide that bold leadership by passing Governor DeWine’s proposed 18-cent motor fuel tax increase.

Sincerely,

Fix Our Roads Ohio Coalition
