Make plans to attend, “Concrete: The Right Choice,” presented by NW Ohio Concrete on Thursday, November 14th at our new location, The Hilton Garden Inn, Levis Commons, Perrysburg, OH from 8:15 A.M. – 3:45 P.M.

This seminar is intended for engineers, designers and those in the industry interested in an in-depth look at specifying, designing and placing concrete slabs on grade. I am excited to have Mr. Chris Tull, CRT Concrete Consulting, make the opening presentation on the many elements that are crucial to designing, specifying and /or placing concrete slabs on grade.

Dan Miller, ODOT Concrete Engineer will provide an update on the latest specifications and the impact they will have on state related construction in regards to Ohio Department of Transportation (ODOT).

A well reviewed speaker from KY will present on insulated concrete forms (ICF) and how their applications can revolutionize how we look at designing and specifying concrete for vertical applications. If you want to know how to ensure you are designing facilities that are resilient, sustainable and aesthetically pleasing you want to hear Jill Lewis Smith speak.

We will explain to you why jointing matters for the performance of your pavement and how small decisions have great impact. Finally, we will provide many ideas for making your concrete pavement perform beyond your expectations.

The seminar will also highlight the following case studies:
- Pratt Paper Facility, (Visited by President Trump)
- Double Concrete Roundabouts in Toledo
