

ICF WALL CONSTRUCTION WEBINAR

MEETING NFPA 285 REQUIREMENTS

Understand how ICF wall assemblies meet fire safety requirements while balancing performance & energy efficiency.

About This Webinar

Exterior wall systems play a critical role in safety, sustainability, & building performance. This session explores NFPA 285 compliance through testing and engineering analysis.

What You'll Learn

- Fire safety + energy performance impact
- 2024 IBC + NFPA 285 requirements
- Testing + engineering compliance
- Real-world ICF applications

Shamim Rashid-Sumar

Senior VP, Codes & Std. For NRMCA

Leads national efforts in building codes & standards & advocates for resilient construction practices.
